

'TEACHER RESOURCES' LESSON PLAN NO 36

PUPPY PUPPET

SUITABLE FOR:

7 to 12yrs

RATING:

Easy Moderate **Hard**

LEARNING OUTCOMES:

Design, Sculpt, Balance

TIME:

3-4 sessions

WHAT YOU WILL NEED:

EC Sculpt-it
EC Paints
EC Chenille Stems
EC Pom Poms
EC Foam Sheet
EC Funstix (for modelling tools)
Egg carton
String
Coat hanger
Margarine or take away container with lid
Extra lid or round piece of card for mouth
Piece of felt and fur scraps, fabric for mouth
Goggle eyes
Needle
Glue gun

METHOD:

Don't panic! It looks like a lot of steps, but follow them through, keep looking at the photos and you will be taking your puppy for a walk at the end.

Mix the Sculpt-it, make sure the mixture is not too wet, it should hold together like moist clay but not ooze water.

Cut four 'cups' from the egg carton. Use these as a base to build your dogs paws on. Use EC Funstix to help to sculpt the paws. Set aside to dry (a few days).

Use the margarine container and lids to build your dogs head and mouth. Poke a hole in the centre of the container and the lid, it needs to be big enough to allow the string to flow smoothly so your dogs mouth can open.
